Ultra Pure Bovine Serum Albumin

GenDEPOT's Albumin(IgG, Fatty acid & Protease free) is a high purity, lyophilized Albumin. The material is initially fractionated by a modified Cohn procedure - a proprietary heat-shock method designed to inactivate proteases and potentially interfering enzymes. The product is then further isolated from other plasma proteins, non-esterified fatty acids and lipids by a unique, non-solvent procedure involving extensive dialysis, filtration and resinbased analyte stripping. Typical purity levels are in excess of 99%, and typical non-esterified fatty acid levels are consistently the lowest in the industry.

Blocking and Dilution for Immunoassay

Protease-sensitive Immunoassay such as RIA, EIA , Fluorescent and Chemiluminesce

Protein, Conjugate or Enzyme Stabilizer

- Serum-free and serum-reduced cell culture
- Fatty acid sensitive cell culture systems
- Hybridization, nucleic acid-based assays
- Hormone and cholesterol assay

Ultra Pure

Fatty acid
Free

IgG
Protease
Free

感謝各大研究單位(中研院、台大、成大、長庚...etc)長久的支持及熱烈的回響

浩盟生技決定再一次破盤優惠價:

原價:~~8600~~元/100g, 現在到 6 月底以前只要 **4,990** 元
